Author Index Volume 134 (2001)

Al-Baali, M., On the behaviour of a combined extra-updating/self-scaling BFGS method 269–281
Almenar, P. and **L. Jódar**, Mixed problems for separated variable coefficient wave equations: analytic–numerical solutions with a priori error bounds 301–323

Badr, A.A., Integro-differential equation with Cauchy kernel 191–199
Baltensperger, R. and **J.-P. Berrut**, The linear rational collocation method 243–258
Bedekar, S., see **Dutt, P.K.** 165–190
Begehr, H. and **X. Li**, Approximate solution of periodic Riemann boundary value problem for analytic functions 85– 93
Berrut, J.-P., see **Baltensperger, R.** 243–258
Boglaev, I., Domain decomposition for a singularly perturbed parabolic problem with a convection-dominated term 283–299
Boros, G., V.H. Moll and **R. Nalam**, An integral with three parameters. Part 2 113–126

Christiansen, S., Detecting non-uniqueness of solutions to biharmonic integral equations through SVD 23– 35
Cozic, M.-I., see **Le Roux, M.-N.** 143–164

Daras, N.J., Composed Padé-type approximation 95–112
Dutt, P.K. and **S. Bedekar**, Spectral methods for hyperbolic initial boundary value problems on parallel computers 165–190

Forsyth, P.A., see **Windcliff, H.** 213–241
Furihata, D., Finite-difference schemes for nonlinear wave equation that inherit energy conservation property 37– 57

García, A.G. and **M.A. Hernández-Medina**, The discrete Kramer sampling theorem and indeterminate moment problems 13– 22
González, M., see **Meddahi, S.** 127–141

Han, G. and **J. Wang**, Extrapolation of Nystrom solution for two dimensional nonlinear Fredholm integral equations 259–268
Hernández-Medina, M.A., see **García, A.G.** 13– 22
Horwitz, A., A version of Simpson's rule for multiple integrals 1– 11

Jódar, L., see **Almenar, P.** 301–323

Le Roux, M.-N., M.-I. Cozic and **R. Loubère**, Analysis of completely discrete finite element method for a free boundary diffusion problem with absorption 143–164
Li, X., see **Begehr, H.** 85– 93
Liu, H., J. Wang and **G. Warnecke**, Convergence of a splitting scheme applied to the Ruijgrok–Wu model of the Boltzmann equation 343–367
Liu, R., see **Wang, J.** 59– 67
Loubère, R., see **Le Roux, M.-N.** 143–164

Mastroianni, G. and **D. Occorsio**, Optimal systems of nodes for Lagrange interpolation on bounded intervals. A survey 325–341
Meddahi, S. and **M. González**, A fully discrete BEM–FEM method for an exterior elasticity system in the plane 127–141
Meek, D.S., see **Walton, D.J.** 69– 83
Moll, V.H., see **Boros, G.** 113–126

Nalam, R., see **Boros, G.** 113–126

Occorsio, D., see **Mastroianni, G.** 325–341

Veling, E.J.M., Analytical evaluation of some Bessel function integrals related to Sonine's finite integrals 201–212
Vetzal, K.R., see **Windcliff, H.** 213–241

Walton, D.J. and **D.S. Meek**, Curvature extrema of planar parametric polynomial cubic curves 69– 83
Wang, J. and **R. Liu**, A new approach to design high-order schemes 59– 67

PII: S0377-0427(01)00491-5

Wang, J., see **Han, G.** 259–268
Wang, J., see **Liu, H.** 343–367
Warnecke, G., see **Liu, H.** 343–367
Windcliff, H., P.A. Forsyth and **K.R. Vetzal,** Shout options: a framework for pricing contracts which can be modified by the investor 213–241
